## WELCOME TO THE CORGI® SEPTEMBER TO DECEMBER 2025 RANGE!

**W**ELCOME TO THE FINAL CORGI® range announcement catalogue for 2025, detailing the new models due to arrive between September and December this year.

As you'll be able to tell from our front cover, we're thrilled to finally complete our die-cast *Thunderbirds* line-up for the first time ever with the arrival of brand-new tools of Thunderbirds 4 and 5, alongside our already available models. Themed to include retro play features in a modern presentation, these premium models have already proven hugely popular in the 60<sup>th</sup> anniversary year of the beloved Gerry Anderson series.

We're also excited to reveal that *Shaun the Sheep* is joining the CORGI® range, following the success of our initial *Wallace and Gromit*

models. Designed to appeal to all ages, our *Shaun the Sheep* Quadbikes are a brand-new tooling that we haven't revealed until now.

2026 is CORGI's 70<sup>th</sup> anniversary, and as you read this we are well into development of one of the most exciting product ranges we've ever put together, featuring refreshed and brand new tool models across the Aviation Archive, Vanguards, and entertainment ranges. We've offered a small sneak peak throughout this year, but there is plenty more to show off come January 2026. We'll see you there, and in the meantime make sure to continue to read Die-Cast Diaries on the CORGI website and follow our social media channels for more surprises as we count down to the new year!

# THE AVIATION ARCHIVE

Following their early announcement at the Royal International Air Tattoo, we've been thrilled with the response to the four models we revealed, including the long-awaited new tooling of the Messerschmitt Me410 Hornisse. Those models are all included here, alongside some new reveals including the first release of an AV-8B Harrier II in 1:48 scale. We're thrilled with this new model that opens the 1:48 scale jets up to an entirely new audience.

As we head into our 70<sup>th</sup> anniversary next year, we're excited to be working behind the scenes on multiple new tool Aviation Archive models to be revealed in 2026, as well as new partnerships that will expand the breadth of the range to new collector audiences and some reintroductions of models that have been absent from the range for years. As well as that, we're working on some quality of life improvements to some of our most popular models to give them a new lease of life! Plenty more to reveal in the new year, so stay tuned!

# Vanguards™

The history of CORGI® is built on model cars, and the Vanguards range continues that legacy today with a range of 1:43 scale editions that span the decades. The backstory, livery, special features and statistics of every Vanguard model are meticulously researched to bring the most accurate replicas to the market. Every model is secured to a removable display plinth and presented in a high quality Perspex display box, with each release including a LIMITED EDITION numbered certificate which details the full fascinating history of the vehicle concerned.

In August we revealed a further expansion of our partnership with Richard Hammond's classic car restoration business *The Smallest Cog* with a brand-

new tool model of the MGB GT coming in 2026 as part of CORGI's 70<sup>th</sup> anniversary and Vanguards' 30<sup>th</sup> anniversary celebrations. The range announced in this catalogue features another new model that we revealed at DriveTribe Live in late August 2025, the modified Ford Capri Mk1 that Richard drove in his final television adventure with Jeremy Clarkson and James May – we're expecting this SPECIAL EDITION to be extremely popular, so make sure you grab yours now for delivery before Christmas!

We're very excited to reveal more plans for our dual anniversary year in 2026, including more new tool models including the long-awaited debut of the Range Rover Classic, plus more that haven't been revealed yet!
