

THE PAGANI V12 ENGINE, A 6-LITER BITURBO SPECIALLY BUILT BY MERCEDES-AMG FOR PAGANI, IS THE RESULT OF AN ENORMOUS DEVELOPMENT WORK: IT DELIVERS 864 BHP AND, ABOVE ALL, A PRODIGIOUS 1100 NM OF TORQUE.

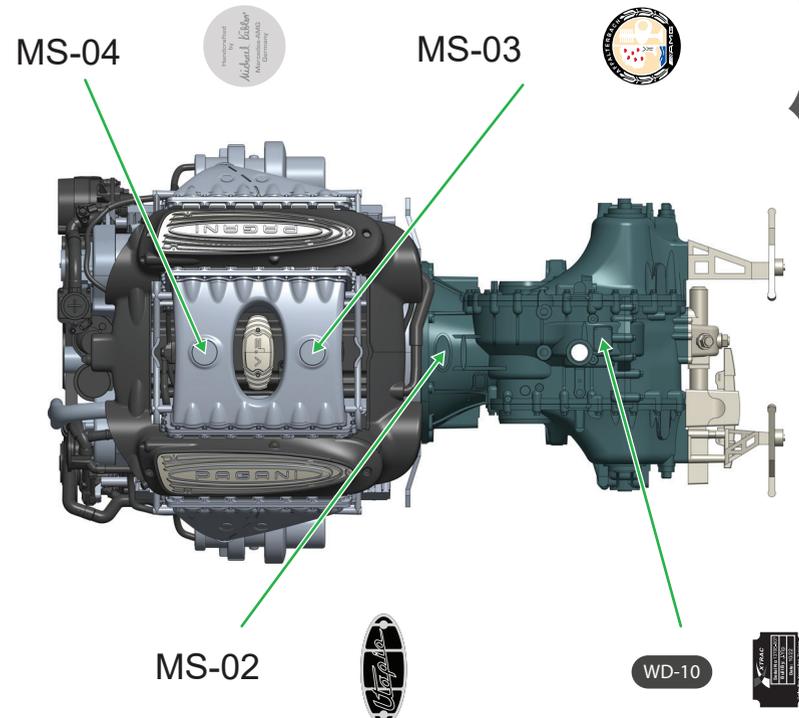

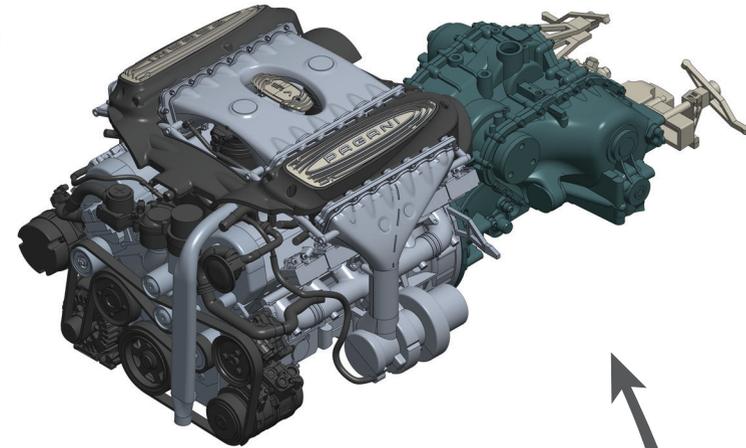

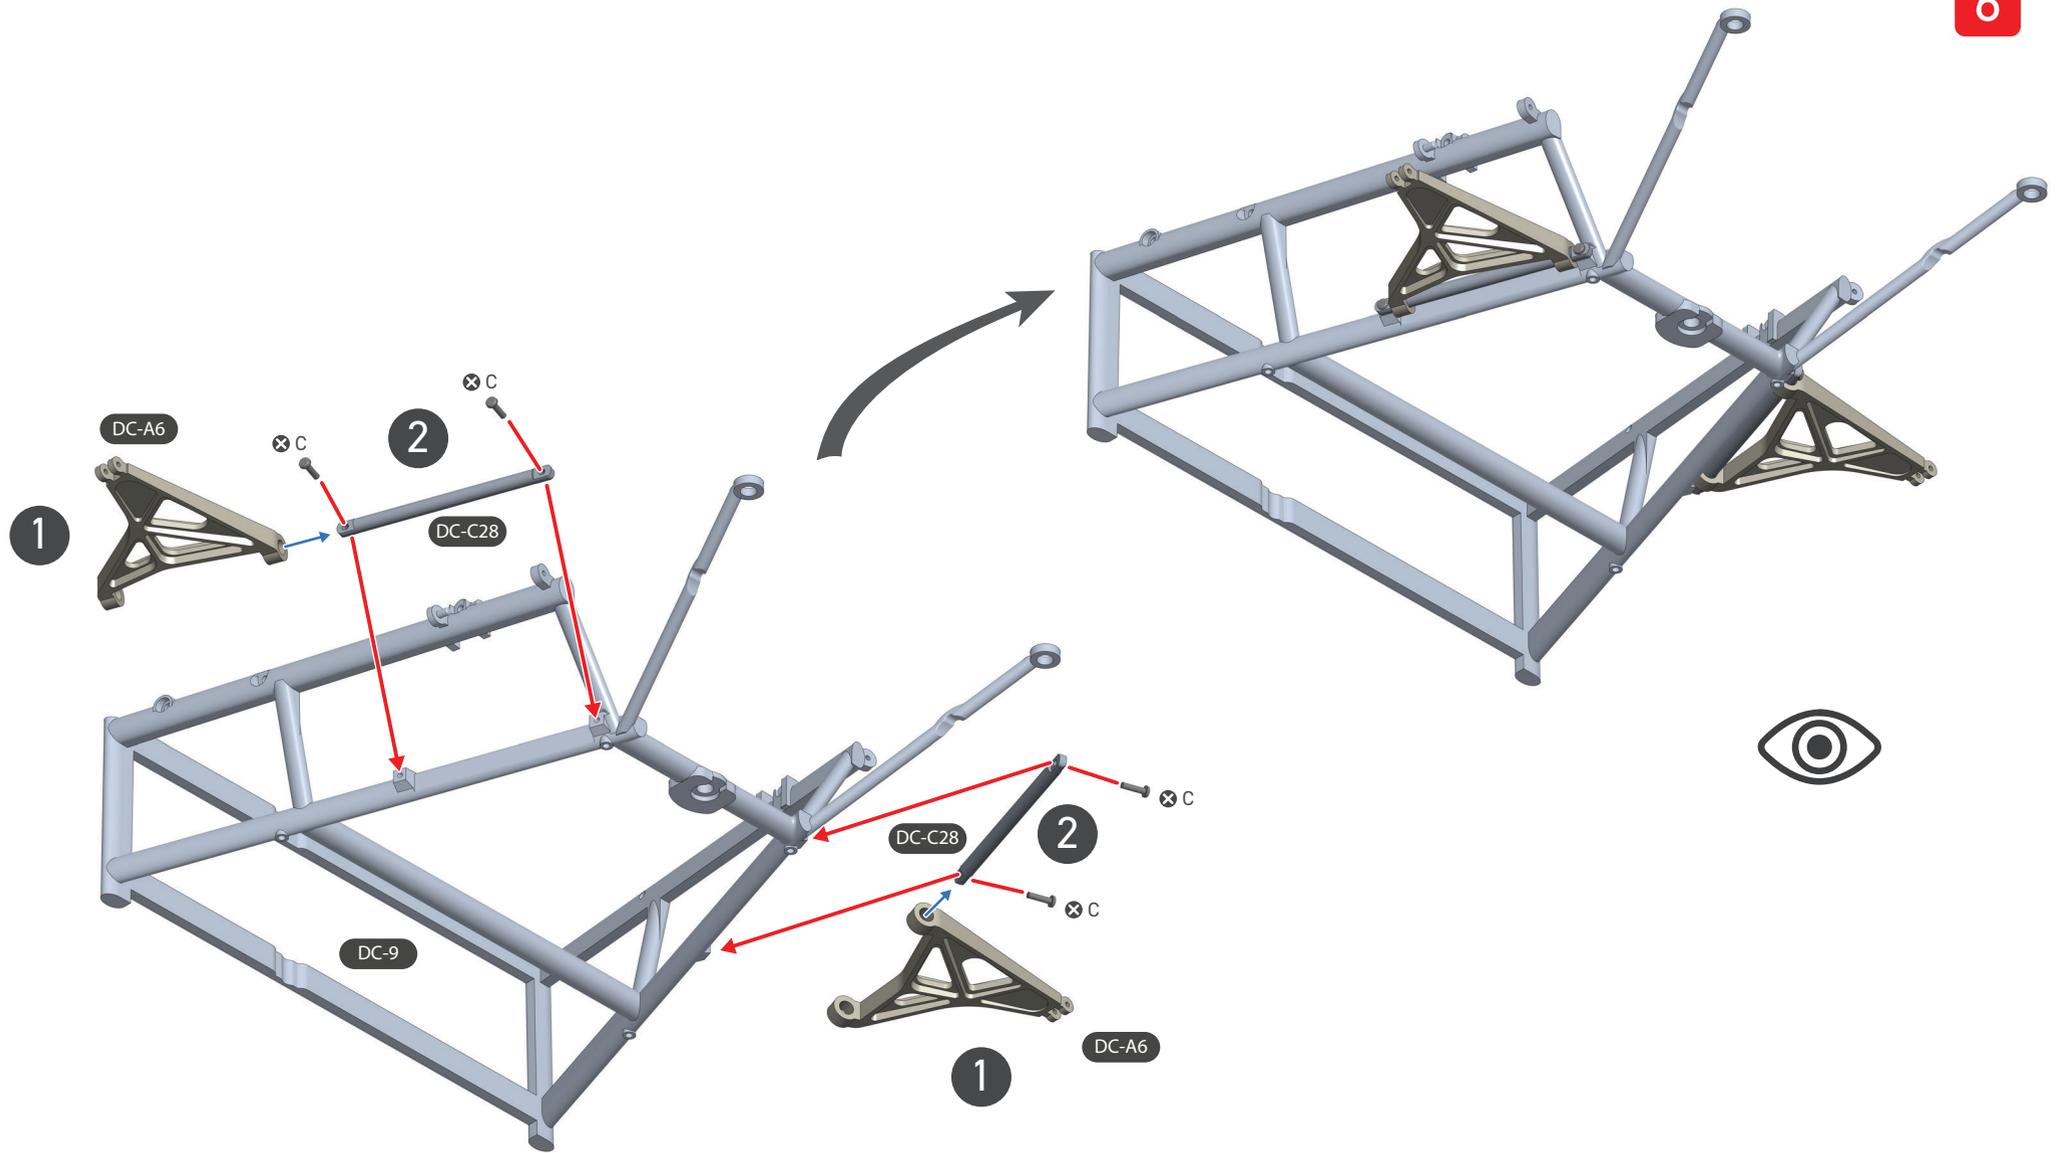

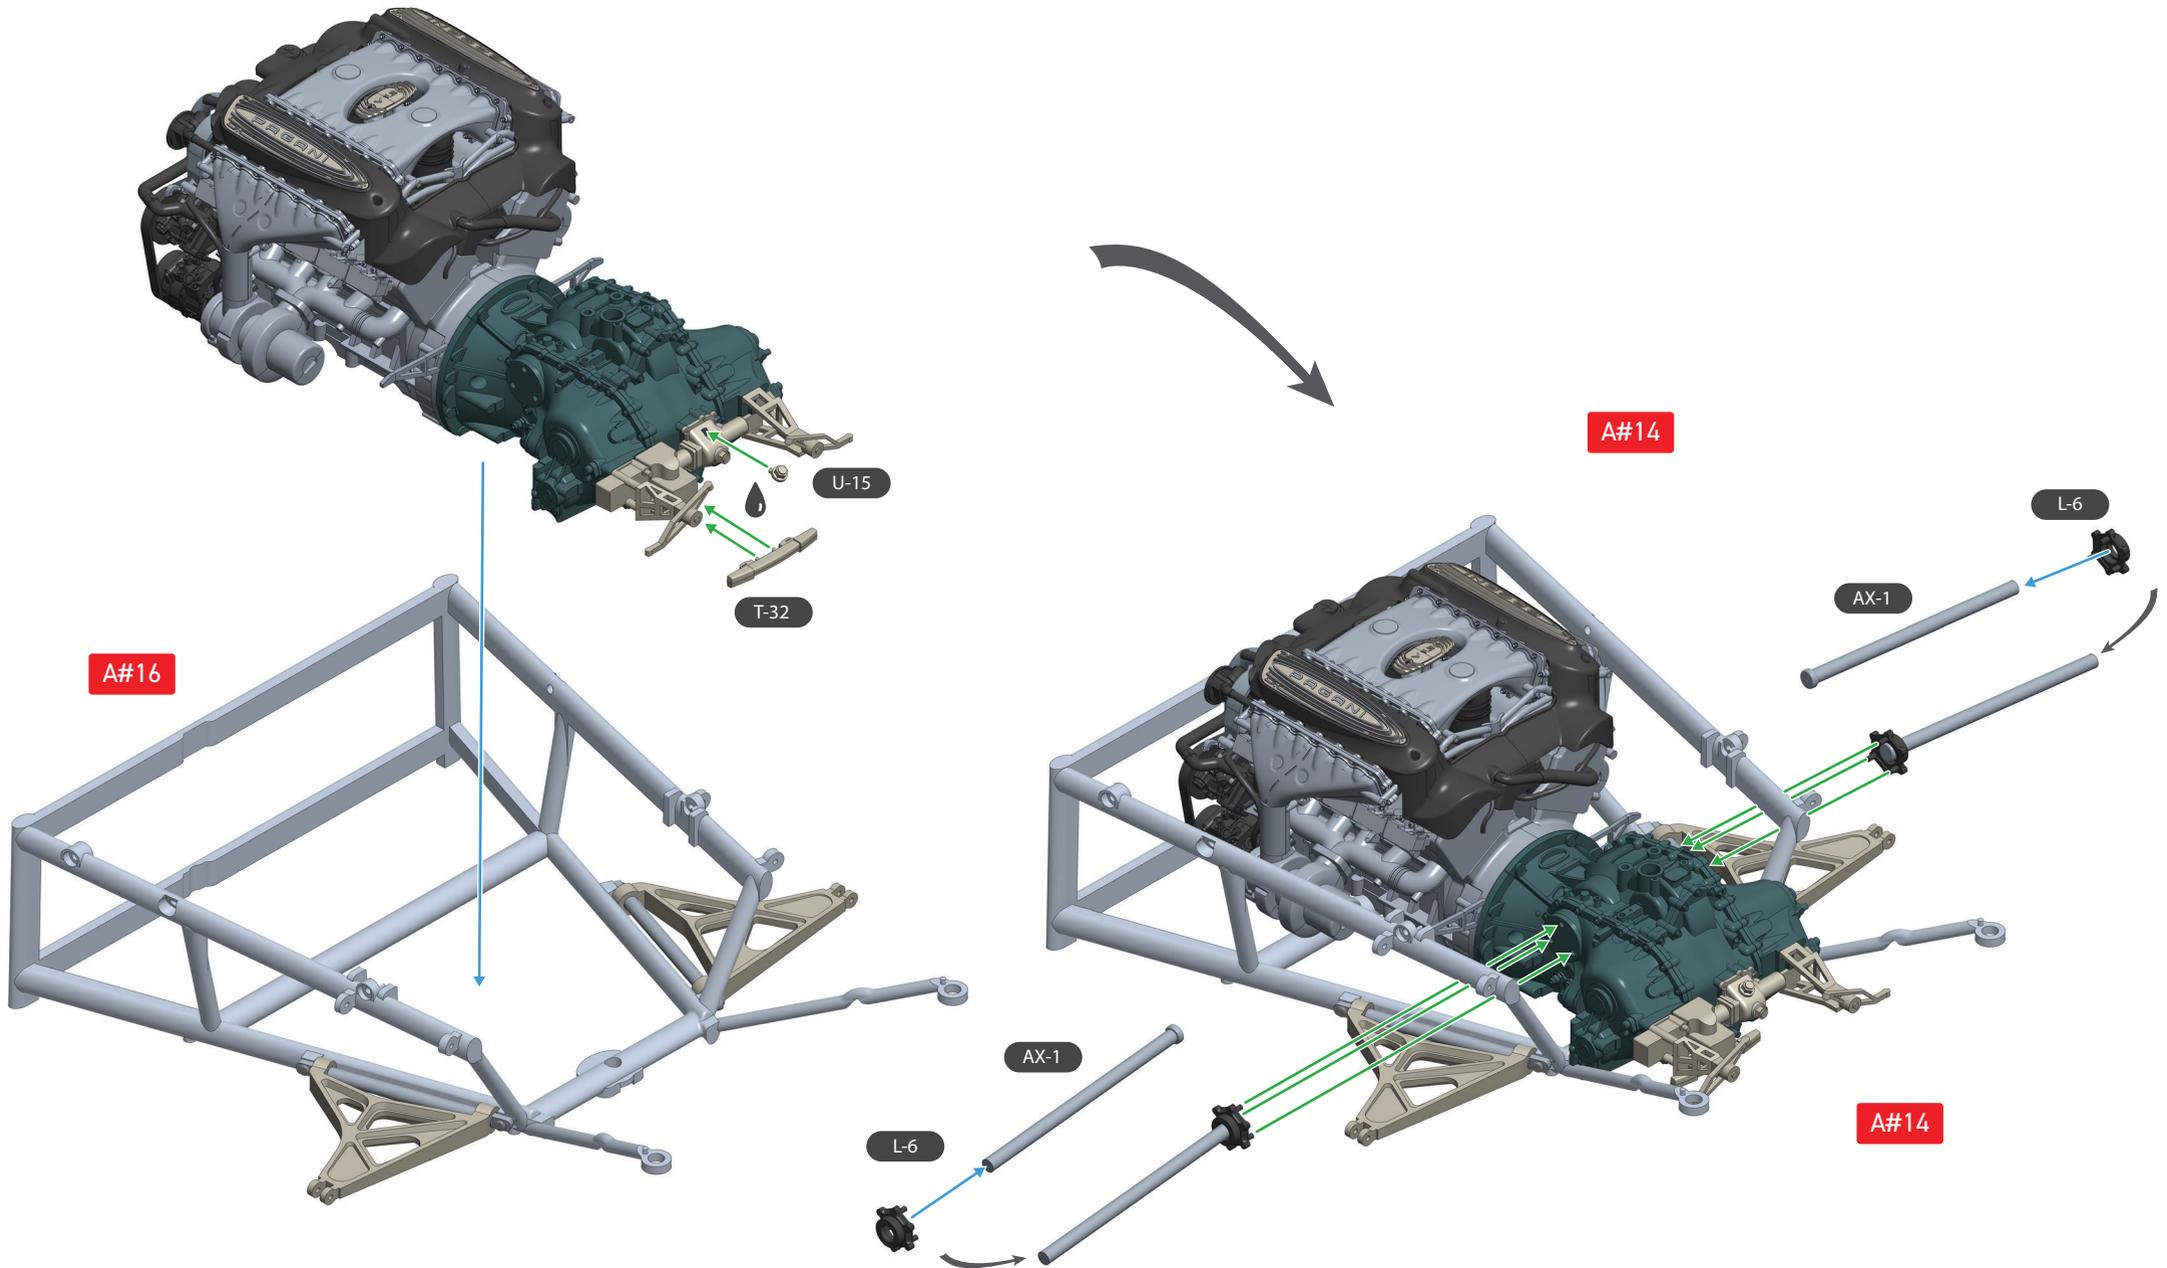

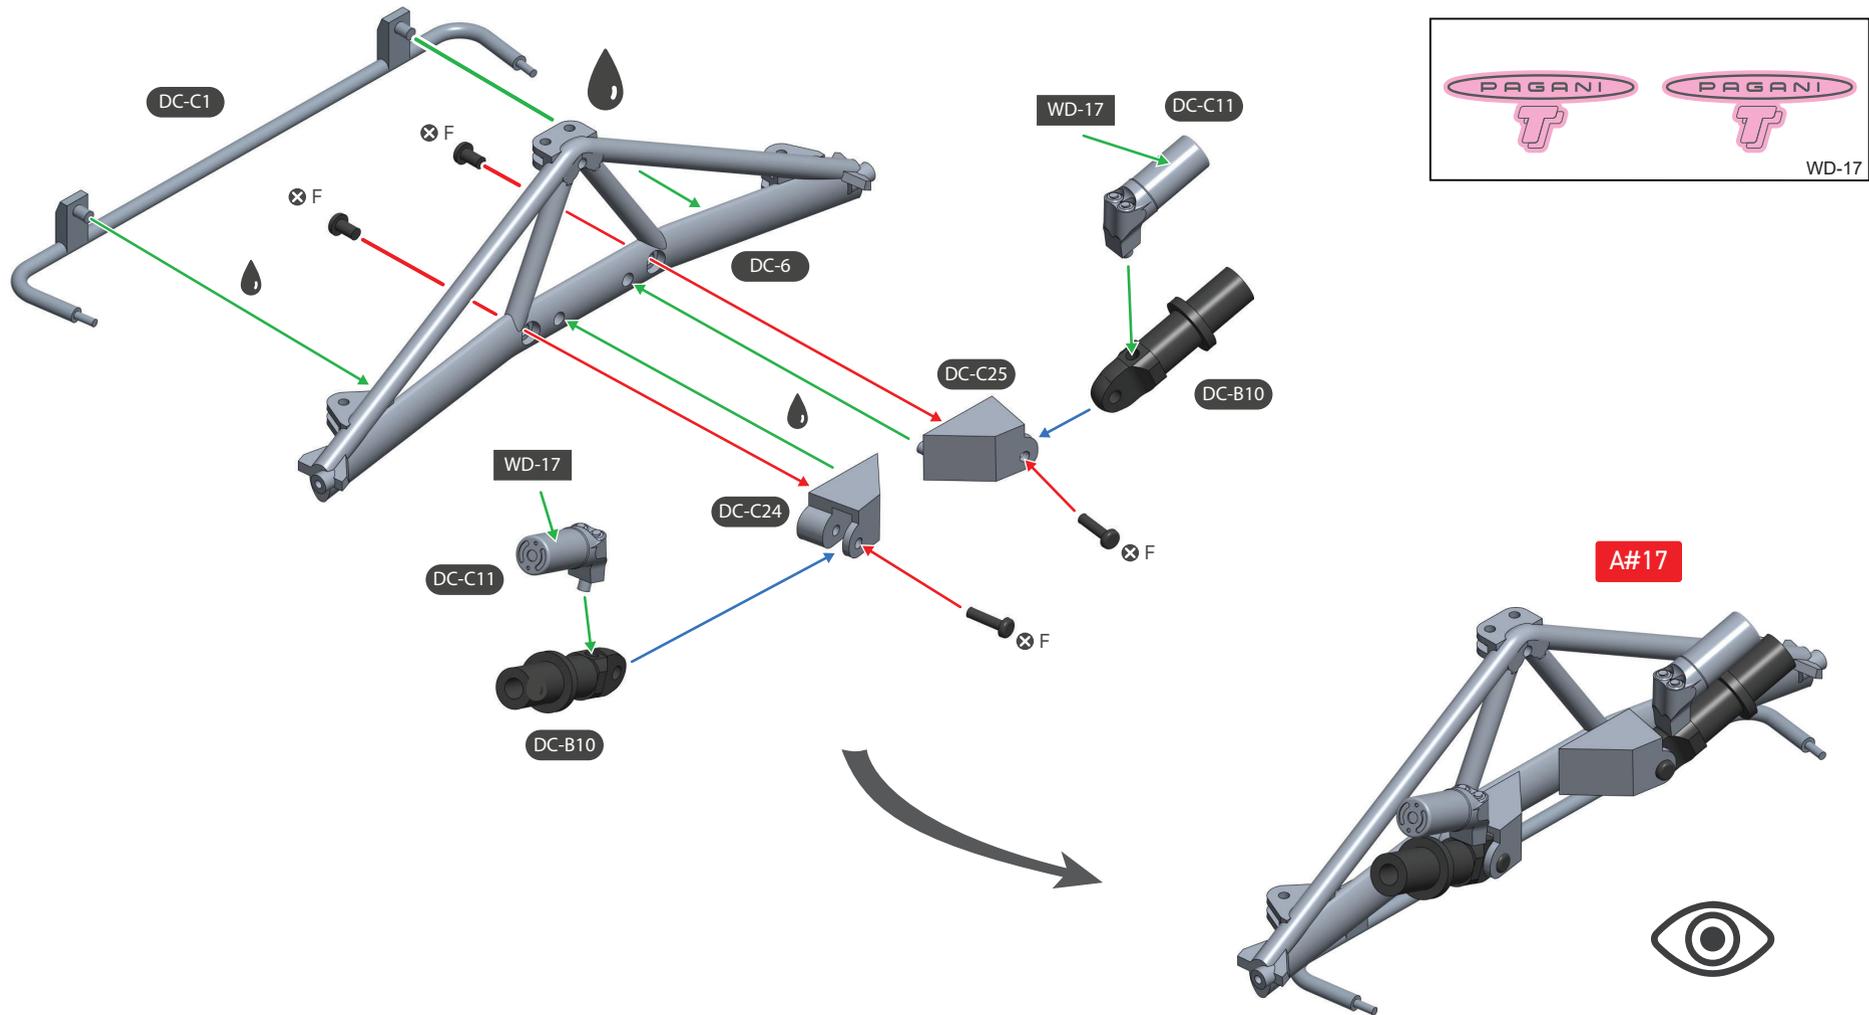

EACH ENGINE IS HAND-BUILT BY A DEDICATED TECHNICIAN AT MERCEDES-AMG, WHO THEN SIGNS THE ENGINE. THESE ENGINES ARE SPECIFICALLY TUNED FOR PAGANI CARS, ENSURING OPTIMAL PERFORMANCE AND INTEGRATION WITH THE CAR'S DESIGN.
