WELCOME TO THE CORGI® JANUARY TO APRIL 2024 RANGE!

WELCOME TO THE FIRST CORGI® catalogue of 2024, detailing the latest releases due to arrive between January and April this year, as well as several products that are now available to pre-order. We're hitting the ground running in this new year with a selection of long-awaited models and a few surprises, including brand-new tools debuting in our Aviation Archive and Vanguard ranges, as well as new releases from our entertainment licences.

Aviation Archive arrivals in this edition include both our new tool 1:72 scale Martin B-26 Marauder and 1:48 scale Panavia Tornado, while Vanguard revs in with the long awaiting new tool Ford Capri Mk2 that finally completes our collection of this iconic Ford vehicle.

The big news in our entertainment licences is the availability - at last - of our long-awaited new tool of Gerry Anderson's Stingray, just in time for the series' 60th anniversary this year.

But look beyond that, and we have some brand-new releases from the world's most famous secret agent James Bond, including a brand new and unique version of the most famous CORGI® toy of them all, and an exciting new triple release of Wallace and Gromit products that allow you to recreate one of their most memorable scenes from the animated classic *'The Wrong Trousers'*.

Plus, leaf through these pages to find out more about future new tooling in all of our ranges for the year in each section!

2024 is set to be a great year for CORGI® fans everywhere with a fantastic selection of new tooling and returning favourite models that will add new stories to your collection. As always, stay tuned to the Die-Cast Diaries blog on corgi.co.uk for updates on everything revealed here, as well as some surprises sprinkled throughout the year to come!

THE AVIATION ARCHIVE

The Aviation Archive range features high quality die-cast aircraft models produced in both 1:72 and 1:48 scales. Newly designed packaging styles highlight each model's place in real-world history, enabling collectors both new and old to easily identify areas of interest while expressing the sheer span and scope of the aviation world. Each aircraft comes with a display stand and many have optional parts enabling the model to be posed either in flight or stationary with the undercarriage down.

The New Year brings with it the chance to pre-order two highly anticipated new tool models. The Martin B-26 Marauder is one of the most undervalued

American bombers of the Second World War but one with the most storied of histories. We are hugely excited to debut this new tool as part of our D-Day range, and the future liveries that this 1:72 scale model can bring to the Aviation Archive range. Also available for pre-order in this catalogue announcement is our 1:48 scale Panavia Tornado. Featuring excellent detail and the famous swing-wing functionality of the real aircraft, this model will be a stand out alongside our other 1:48 scale jet aircraft.

And coming later in 2024, we are excited to confirm the much-requested Messerschmitt Me410 will be joining our 1:72 scale World War Two range. Stay tuned for updates on that one!

Vanguards™

The history of CORGI® is built on model cars, and the Vanguards range continues that legacy today with a range of 1:43 scale model cars that span the decades. The backstory, livery, special features and statistics of every Vanguard model are meticulously researched to bring the most accurate replicas to the market. Every model is secured to a removable display plinth and presented in a high quality Perspex display box, with each release including a limited edition numbered certificate which details the full fascinating history of the vehicle concerned.

2024 sees the long overdue completion of our Ford Capri collection with the introduction of our new tool Ford Capri Mk2. Plugging a huge hole in the

Vanguards range, this will be a versatile tooling that allows us to finally present the full family of this classic Ford mark to collectors.

But that's not all the new tooling for the year, as we finally begin to expand the Ford Fiesta family with the introduction of the Ford Fiesta Mk2 to the range. From the top spec XR2 all the way to the 1.1 Poplar Plus, this new tool will be able to cover off this beloved vehicle that meant so much to so many owners.

And away from Ford, we're delighted to say we will be adding one of the most famous off-road vehicles to the range in its very first incarnation. The Range Rover Classic will be an extensively featured new tool that will cover off both two and four door versions of this iconic vehicle. More to come on all of these later in the year!

POP CULTURE

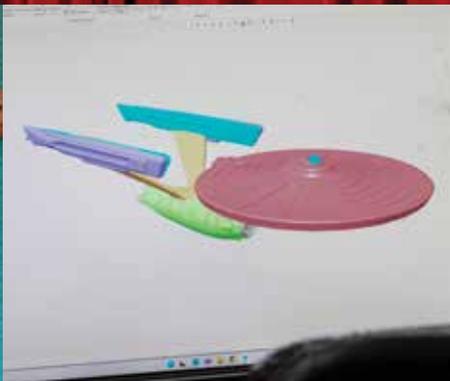

The big news for this packed first CORGI® range announcement is the arrival of Gerry Anderson's 'Stingray'. Highly requested since we announced development of the model last year, this is one not to miss if you are fan of the legendary television series in its 60th anniversary year. Stingray isn't the only piece of pop culture celebrating it's 60th this year though, as the most iconic James Bond film of them all marks this milestone.

To commemorate the 60th anniversary of 'Goldfinger', we knew we had to do something special, and so the most famous CORGI® model of them all returns in a brand new, never before released form. The action packed

classic 261 Aston Martin DB5 was famously released in a gold paint finish back in 1964 and was only ever released in that colour.... Until now.

There's more Bond in this edition besides that though, as we also have a new tool version of the impressive Q Glider from 'No Time To Die', and the next edition of our highly detailed 1:12 scale Triumph Scrambler 1200 XE.

Plus, Wallace and Gromit return with a hugely exciting, all new tool collectible die-cast display piece that recreates one of the most famous moments from 'The Wrong Trousers'! And there's more to come in 2024, including new tooling for our new Star Trek range as well as a few surprises still to be announced!

Stand By For Action! We're delighted to say that Gerry Anderson's Stingray is now available in the CORGI® range! Designed to be the toy Stingray never received back in the 1960s, this nostalgic die-cast model features firing Sting Missiles and arrives in time to mark the series' 60th anniversary in 2024!

STINGRAY

CC01001 Stingray

NEW TOOL | Length 150mm

The flagship of the World Aquanaut Security Patrol (WASP), Stingray is a renowned combat submarine that is piloted by Captain Troy Tempest and his hydrophone operator Lieutenant George Lee Sheridan, also known as 'Phones'.
